

EDUCATION

Punjab University College Of Information Technology <i>BS Computer Science</i> Coursework: <i>Programming Fundamentals, Discrete Structures, Object-Oriented Programming, Computer Networks, Computer Organization & Assembly Language. Database Systems, Artificial Intelligence, Machine Learning, Computer Vision, Design and Analysis of Algorithms, Mobile App Development, Enterprise App Development (Java), Information Security, Software Project Management.</i>	Lahore, Pakistan Sept '22 - June '26
Akhuwat College & University <i>Intermediate (ICS)</i> <i>Computer Science, Physics, Maths, and English.</i>	Kasur, Pakistan Oct '20 - May '22

EXPERIENCE

Linux Admin & DevSecOps Software Developer <i>Upwork (Freelance)</i> - Maintained a Top Rated status by delivering highly reliable server management, infrastructure setup, and troubleshooting services for global clients. - Provided end-to-end Linux administration, including DNS clustering, web server configuration (Nginx), and database optimization. - Reduced manual system administration overhead by developing efficient automation scripts and implementing modern DevOps practices.	Jan'25 - Present
Cyber Security Intern <i>SenseLearner (Remote)</i> - Gained hands-on experience in Linux security, OSINT, and social engineering, enhancing threat analysis skills. - Developed proficiency in shell scripting and SQL injection testing for ethical hacking and automation.	May - Jul'24

PROJECTS

MindMesh - An AI-Moderated Academic Discussion Platform for Verified Scholars (Final Year Project) <i>React.js, Node.js, PostgreSQL, Mistral API</i> - Developed a verified academic platform for students and teachers to share knowledge and collaborate on research. - Containerized a multi-service architecture including a Node.js backend, Python AI workers, and React frontend using Docker and Docker Compose. - Configured Nginx as a reverse proxy to route API traffic and automated SSL certificate provisioning using Let's Encrypt (Certbot). - Deployed the full technology stack on a DigitalOcean Droplet, utilizing Redis for background worker queues and PostgreSQL for persistent data storage.
PerformancePlus - Employee Performance System <i>Java Servlets, JSP, MySQL, Bootstrap</i> - Created a web application to help companies track employee goals (KPIs) and provide manager feedback. - Developed separate dashboards for admins, managers, and employees to monitor progress and system logs. - Added a live-sync feature that automatically updates progress bars and data without refreshing the page. - Managed data storage using MySQL and focused on creating a clean, responsive UI with Bootstrap.
Clouvy - Production Infrastructure Setup <i>Freelance DevOps Administrator</i> - Executed a live production server migration across multiple VPS environments to ensure zero data loss. - Configured and maintained DNS clusters to ensure high availability and reliable traffic routing for client web services. - Automated routine system administration and performance optimization tasks using custom Bash scripts.

CERTIFICATIONS

Become a Linux System Administrator (<i>LINKEDIN</i>) Gained expertise in system administration, Linux kernel, network management, and CompTIA Linux+.
Shell Scripting for DevOps (<i>COURSERA</i>) Learned to write and read Bash scripts and understand fundamental components of Shell scripting for DevOps.
Learning Linux for LFCA Certification (<i>COURSERA</i>) Completed 'Learning Linux for LFCA Certification' specialization on Coursera, covering Linux fundamentals, system management, security, and DevOps.
Networking Basics (<i>CISCO</i>) Earned Networking Basics badge from Cisco, covering network types, data transmission, IP addresses, and building home networks.
Advanced Commands in Linux (<i>COURSERA</i>) Learned to download websites, synchronize directories for backup, and manage applications using advanced Linux commands.

TECHNICAL SKILLS

Infrastructure & Cloud: Docker, Docker Compose, Kubernetes, Linux System Administration, AWS, DigitalOcean, Contabo. Web Servers & CI/CD: Nginx, Reverse Proxy Configuration, SSL/TLS (Certbot), GitHub Actions. Databases & Caching: PostgreSQL, MySQL, Redis Programming & Scripting: Bash/Shell Scripting, Python, C/C++, Java

INTERESTS

Playing Chess, Cricket, Learning Languages (German), and Googling.
