EDUCATION

Punjab University College Of Information Technology

BS Computer Science

- Coursework:** Programming Fundamentals, Discrete Structures, Object-Oriented Programming, Computer Networks, Computer Organization & Assembly Language, Database Systems, Artificial Intelligence, Machine Learning, Computer Vision, Design and Analysis of Algorithms, Mobile App Development, Enterprise App Development (Java).

Lahore, Pakistan

Sept '22 - Jan '26

Akhuwat College & University

Intermediate (ICS)

- Computer Science, Physics, Maths, and English.

Kasur, Pakistan

Oct '20 - May '22

EXPERIENCE

Linux Administrator | Software Developer

[Upwork](#) (Freelance)

- Freelance Linux & C++ developer with experience in system administration, scripting, and performance optimization.
- Providing Linux system administration and C++ development services, server management, memory optimization, and custom software solutions.
- Committed to quality and client satisfaction, delivering efficient solutions with positive feedback.

Jan'25 - Present

Web Development Intern (Django)

Social Swirl

- Learned to develop web applications using **Django** for Social Swirl, enhancing **backend** and teamwork skills.

Sep'24 - Oct'24

Cyber Security Intern

SenseLearner (Remote)

- Gained hands-on experience in **Linux security**, **OSINT**, and social engineering, enhancing threat analysis skills.
- Developed proficiency in **shell scripting** and **SQL injection testing** for **ethical hacking** and **automation**.

May - Jul'24

C++ Intern

CodeSoft (Remote)

- Worked with C++ and **GitHub**, improving coding efficiency and **version control** skills.

Sep'24

PROJECTS

[MindMesh](#) - Academic Social Platform (Final Year Project - In Progress) | *React.js, Node.js, PostgreSQL, Gemini API*

- Developing a verified academic platform for students and teachers to share knowledge and collaborate on research.
- Building an AI moderation system using Gemini API to automatically filter out off-topic or non-academic posts.
- Implementing real-time features like direct messaging with Socket.IO and a user reputation system based on contributions.
- Designing a structured database in PostgreSQL to manage threaded discussions, user follows, and subject-based categories.

[PerformancePlus](#) - Employee Performance System | *Java Servlets, JSP, MySQL, Bootstrap*

- Created a web application to help companies track employee goals (KPIs) and provide manager feedback.
- Developed separate dashboards for admins, managers, and employees to monitor progress and system logs.
- Added a live-sync feature that automatically updates progress bars and data without refreshing the page.
- Managed data storage using MySQL and focused on creating a clean, responsive UI with Bootstrap.

CERTIFICATIONS

Become a Linux System Administrator (LINKEDIN)

- Gained expertise in system administration, Linux kernel, network management, and CompTIA Linux+.

Shell Scripting for DevOps (COURSERA)

- Learned to write and read **Bash scripts** and understand fundamental components of **Shell scripting** for **DevOps**.

Learning Linux for LFCA Certification (COURSERA)

- Completed 'Learning Linux for LFCA Certification' specialization on Coursera, covering Linux fundamentals, system management, security, and DevOps.

Networking Basics (CISCO)

- Earned **Networking Basics** badge from Cisco, covering network types, data transmission, IP addresses, and building home networks.

Advanced Commands in Linux (COURSERA)

- Learned to download websites, synchronize directories for backup, and manage applications using advanced **Linux commands**.

TECHNICAL SKILLS

Programming Languages: C/C++, Python, Java, Linux (Shell Scripting), Assembly (8086), OOPs

Developer Tools: Git/GitHub, Docker, and Kubernetes VS Code | **Databases:** SQL, MySQL

INTERESTS

Playing Chess, Cricket, Learning Languages (German), and Googling.
